

March 6, 2006

I had a real problem with a sewer drain which ran underneath my house. After getting a couple of estimates, some companies wanted to dig up my basement and replace the entire pipe under my house. I even got an estimate from someone who said that they did in-line pipe replacement and they informed me that it could not be done and that they had to dig up a 20 foot section of my basement area. Not being satisfied with some of the evaluations, I called Expert Plumbing Service to see what they would tell me. Within one hour, they had an estimate that was thousands of dollars less and they also informed me that they could do the pipe lining with no problem. A small two foot hole and six hours later, they had the pipe lined and my sewer back in shape.
